Hiring Team,

Olive Tree Consulting Group,
London, United Kingdom.

Subject: Application for Associate Frontend Engineer

Dear Hiring Team,

I am writing to express my interest in the Associate Frontend Engineer position at Olive Tree Consulting Group. Your firm's philosophy that "memory is not a management system" and your focus on building practical, plain, and reliable digital workspaces strongly resonates with my own approach to software engineering. I am highly motivated to help build functional browser-based tools that bridge the gap between strategy and execution for your London client.

Currently completing a BSc in Electronics and Computer Science, I have cultivated a strong foundation in modern JavaScript, HTML5, CSS3, and React. My engineering background is focused on transforming wireframes into responsive, pixel-perfect layouts using robust layout techniques and reusable component libraries. I firmly believe that internal tools should prioritize legibility and ease of use over visual complexity, and I take pride in writing clean, maintainable code that directly solves organizational problems.

Furthermore, your emphasis on web accessibility perfectly aligns with my technical expertise. I have extensive hands-on experience engineering strict WCAG accessibility compliance features, ensuring that digital interfaces are reliably accessible via screen readers, ARIA labels, and proper keyboard navigation. I know that for a management tool to be truly useful, it must be functional and professional for every member of the client team across any browser.

While I am based in Sri Lanka, I am fully prepared to work on UK business hours to ensure seamless synchronous collaboration with your London-based client and the wider remote team. I am highly accustomed to working in distributed agile environments, relying on clear, written communication to document updates, ask questions early, and actively participate in code reviews. I am comfortable working independently while staying deeply connected to team objectives.

I would welcome the opportunity to bring my technical skills, attention to detail, and dedication to practical functionality to Olive Tree Consulting. My portfolio and GitHub profile demonstrate my commitment to building accessible and structured web applications.

Sincerely,

Thusitha Kithuldora
