

Thusitha Kithuldora

Full-Stack Software Engineer

Colombo, Sri Lanka | +94762600331 | thusithakit3@gmail.com

LinkedIn: [thusitha-kithuldora](https://www.linkedin.com/in/thusitha-kithuldora) | Portfolio: <https://www.thusithakit.com>

Professional Summary

Results-driven Software Engineer with a strong foundation in modern programming languages, including Java and JavaScript. Proven ability to bridge hardware and software through IoT deployments and deliver scalable, high-performance web applications. Adept at agile methodologies, defect resolution, and collaborating across teams to engineer robust enterprise solutions.

Technical Skills

- **Computer Science Fundamentals:** Data Structures, Algorithms, Object-Oriented Programming (OOP), Agile Methodologies, Defect Resolution, Full-Stack Development.
- **Languages:** Java, TypeScript, JavaScript (ES6+), Go (Golang), HTML5, CSS3/SASS.
- **Frontend Frameworks & Libraries:** React, Next.js (App Router), Redux, Zustand, Axios, Vite Module Federation.
- **Backend, Databases & Cloud:** Spring Boot, Echo (Golang), Google Cloud Platform (GCP), Terraform, MongoDB, MySQL, SQL Server, Firebase, Prisma ORM.
- **Testing & Code Quality:** Vitest, Cypress, Playwright, SonarQube, Snyk.
- **Tools, Analytics & Platforms:** Git/GitHub, REST APIs, PostHog, Userflow, Micro-frontends, PWA, SEO Optimization, Postman, Vercel, Netlify.

Professional Experience

Trainee Software Engineer | Qoria LK | Colombo

Sep 2025 - Present

- Took full ownership of the design and frontend development for the new Public App Directory, delivering a high-impact feature anticipated to drive major adoption for the EdTech Manager product during the back-to-school season.
- Participate actively in agile ceremonies, working cross-functionally with UX designers, backend teams, and product owners to deliver software components.
- Investigate and resolve critical production bugs, and execute UI/UX enhancements using Chakra UI and Axios.
- Write and maintain comprehensive end-to-end and unit testing suites utilizing Vitest, Cypress, and Playwright to safeguard application stability.
- Enforce strict engineering best practices and secure code standards by integrating SonarQube and Snyk into the development workflow.
- Leverage product analytics and onboarding platforms, including PostHog and Userflow, to track user journeys and optimize feature adoption.

- Collaborate on **EdTech Manager**, a production-level micro-frontend application, utilizing React, TypeScript, Vite Module Federation, and Redux.
- Spearhead the engineering and remediation of WCAG accessibility compliance features, improving keyboard navigation and screen-reader compatibility.

UI Developer | Kongcepts | Kandy

Oct 2023 - Sep 2025

- Optimized website loading speeds by up to 50% across key corporate properties through strategic image optimization, code-splitting, and AMP integration.
- Transformed complex Figma, PSD, and Adobe XD wireframes into responsive code, maintaining a 100% client approval rating for major deliverables.
- Boosted average user session duration by 40% on revamped client web applications by introducing intuitive navigation and interactive elements.
- Elevated organic search discoverability, boosting SEO scores by 20% to 35% using semantic HTML, structured schema markup, and metadata optimization.
- Implemented framework-level accessibility controls to bring legacy web projects up to strict WCAG 2.1 AA standards.

Projects

Real-Time Collaborative Jukebox Platform | *Next.js, TypeScript, Firebase, Zustand, Vitest*

Live Demo: <https://vibequeue.vercel.app> | Repository: <https://github.com/thusithakit/music-vote>

- Architected a real-time collaborative platform with passcode-protected session states, managing instantaneous multi-user track submissions and live peer-presence tracking for concurrent users.
- Designed a multi-tiered tie-breaker sorting algorithm using global state management and state hooks to compute live queues instantly by Net Score, consensus filtering, and FIFO timestamping.
- Engineered client-side security mechanisms to sanitize streaming payloads, mitigating network-tab exposure and ensuring metadata integrity during concurrent, blind voting operations.

ConnectWithMe.digital Platform | *Next.js, TypeScript, Prisma, Clerk, Cloudinary*

Live Demo: <https://www.connectwithme.digital> | Repository: <https://github.com/thusithakit/share-my-socials>

- Engineered a high-performance personal branding and profile-sharing application featuring secure multi-tenant authentication and dynamic, SEO-optimized public routing.
- Integrated instant vCard contact serialization and automated canvas-based QR code generation engine to optimize cross-platform profile sharing capabilities.

- Leveraged automated cloud asset management pipelines for real-time media compression, reducing asset loading overhead and improving multi-device responsiveness.

IoT-Enabled Smart Garbage Bin System (Final Year Project) | Next.js, TypeScript, Firebase

Live Demo: <https://go-green-khaki.vercel.app> | *Repository:* <https://github.com/thusithakit/go-green>

- Architected a full-stack Progressive Web App (PWA) deploying 3 decoupled role-based operational dashboards supporting live stream telemetry for 10+ hardware nodes.
- Programmed asynchronous hardware-to-cloud telemetry pipelines syncing ultrasonic and GPS data streams to Firebase, reducing manual inspection overhead by 70%.
- Optimized the client-side synchronization architecture to securely sustain 100+ concurrent user connections with built-in local fallback caching and offline database support.

Certifications and Badges

- **Creating Infrastructure on Google Cloud with Terraform** - Google Cloud Skills Boost
Issued: Jan 2026 (Credential ID: [21509144](#))
- **Google Cloud Fundamentals: Core Infrastructure** - Google Cloud Skills Boost
Issued: Oct 2025 (Credential ID: [19423909](#))
- **HTML/CSS Certificate** - TestDome
Issued: Dec 2020 (Credential ID: [5f1ad25f3c0e4df3ac3568749f44cb53](#))

Education

BSc (Hons) in Electronics and Computer Science

University of Kelaniya, Sri Lanka

2022 - 2026
